

DECLARATION — DIMETHYL FUMARATE (DMF) FREE

Product compliance declaration issued by DryGelWorld for its silica gel desiccant products.

Declaration

DryGelWorld hereby declares that the silica gel desiccant products it manufactures and supplies (paper/non-woven sachets, bulk beads, and container desiccant strips) do **not** contain and are **not** treated with Dimethyl Fumarate (DMF).

Reference Details

Substance	Dimethyl Fumarate (DMF)
CAS No.	624-49-7
Regulatory reference	EU Commission Decision 2009/251/EC (and subsequent extensions)
Product scope	All DryGelWorld silica gel desiccant products
Statement	DMF is not added, used as an anti-mould agent, or present in the packaging.

Basis of Declaration

Silica gel is an inert, amorphous form of silicon dioxide (CAS 7631-86-9) used as a physical adsorbent. It does not require, and DryGelWorld does not use, Dimethyl Fumarate or other fungicidal sachets in its desiccant products. This declaration supports compliance for goods exported to the European Union and other markets that restrict DMF.
