

PRODUCT SPECIFICATION — CONTAINER DESICCANT STRIPS

High-capacity hanging desiccant strips/poles that protect shipping containers and their cargo from moisture, condensation and 'container rain' during ocean freight.

Product Overview

Product	Container desiccant hanging strips / poles
Desiccant fill	High-adsorption silica gel (clay/CaCl ₂ hybrid grades on request)
Format	Multi-pocket hanging strip with hook / adhesive fixing
Function	Lowers container humidity; prevents mould, rust, caking and label damage
Compliance	DMF-free (see DMF-free statement)

Standard Sizes

Net weight	Typical coverage	Format
1 kg	Part-load / LCL pallet zone	Hanging strip
1.5 kg	Half 20 ft container (approx.)	Hanging strip
2 kg	20 ft container (typical)	Hanging strip / pole
5 kg	40 ft container (typical)	Hanging pole

Usage & Ordering

Dosage guidance	Use the DryGelWorld container calculator or contact sales for tonnage advice
Fixing	Hang from container lashing rings; do not place in direct contact with cargo
Inner packing	Sealed moisture-proof film
Outer packing	Export carton; pallet on request
MOQ / Incoterms	Contact sales; EXW Karachi / FOB / CIF available

Note: Coverage figures are indicative and depend on cargo type, voyage length and climate. Confirm dosage and fill chemistry with DryGelWorld before ordering.
